The American Red Cross currently has a critical need for blood and the success of our drive is important to ensure blood products are readily available for patients.

Safety is a priority for everyone and the Red Cross emphasizes that each blood drive follows the highest standards of safety and infection control:

- ◆ Appointments are spaced to minimize contact
- ◆ Attendees are pre-screened before entry
- ◆ Face masks are required
- ◆ Donors are spaced 6 feet apart throughout the drive
- ◆ Enhanced cleaning practices are used and gloves are worn and changed frequently
